FOR IMMEDIATE RELEASE

HEAT SEAL'S ENERGY SMART™ WRAPPER SAVES MONEY IN RETAIL SUPERMARKETS

New Wrapper Saves 50-80% In Energy Costs

May 7, 2012 – Cleveland, OH – At FMI 2012 Dallas, TX, Heat Seal, LLC disclosed that it has been working for the past three years with a national supermarket chain on a new energy saving wrapper. The announcement was intended to begin educating the market regarding the new technology; units will not be fully available until sometime in 2013.

Using an innovative on-demand sealing technology, units tested show that the wrapper reduces energy consumption by 50-80%. Energy is consumed by the seal plate only when store associates need to seal a package. The new units provide significant energy conservation by no longer requiring the seal plate to be energized throughout the day.

Interested parties should contact Heat Seal for more information on the education and commercialization process of the Energy Smart™ Wrapper.

Heat Seal, LLC manufactures a full line of packaging and process equipment for the food service and industrial packaging markets. Founded in 1950, Heat Seal is known for their food processing and packaging equipment, such as stretch film overwrappers, Scalemates, pineapple peeler and corers, cheese cutters, and heavy duty stainless steel tables. Heat Seal also specializes in shrink packaging equipment, and wrappers and bundlers for the laundry industry. After purchasing Ampak in 1994, Heat Seal expanded their reach into skin packaging and vertical bagging. All products are manufactured within the USA. Heat Seal's commitment to quality and innovation has allowed the company to continue to be the leader within the markets they serve.

Heat Seal, LLC is located in Cleveland, Ohio.
